ASKING QUESTIONS USING EVIDENCE TESTING THEORIES

“If it could be demonstrated that any complex organ existed, which could not possibly have been formed by numerous, successive slight modifications, my theory would absolutely break down. But I can find no such case.”

- Charles Darwin 1859

“Ignorance more frequently begets confidence than does knowledge: it is those who know little, and not those who know much, who so positively assert that this or that problem will never be solved by science.”

- Charles Darwin

Humanists celebrate Charles Darwin’s birthday on February 12th

International Darwin Day

This recognises the significance of his work on evolution by natural selection as well as his scientific way of working – asking questions, using evidence, testing theories.

No better method has been found to understand how the world works.
